\$DG = Levels matter

In any daily chart = price levels, support, resistance, trendlines, Moving Averages (MA's) all **MATTER**

Another clear cut example is \$DG's last 3 days:

Do you think today's opening quick dip was to some Forward PE number? Price to Book ??? No, it was exactly to the penny, bounced off the 20MA -- Friday, nearly same thing -- Thursday, was probably exactly the same thing until the 20MA has shifted slightly upward from 2 green days ●

In any daily chart = price levels, support, resistance, trendlines, Moving Averages (MA's) all **MATTER** (edited)
