@everyone  
keep watching the previous couple days, those are still valid, these are just new watchers

Oil/XLE's could be weird bouncer for rebound play, they all look good

XLF's look dippy

XLV's starting to look dippy after the tremendous start to 2024 (edited)

\$XLE above VWAP now are we moving for sure ??

well, stay \$XLE to be broader, and not get hit by one ticker -- we're in the 2/16exp 82c but there are several other strikes w/ solid VOLUME today, IV is still quite low, has a couple more days before hitting some traffic overhead (20MA, then 50MA) -- doesn't mean it can bust through that traffic, but that's just the caution sign for us

We alert, you trade, you win
